BUILD MIXTURE PART NUMBER:

To build your part number, select the code that corresponds to each section. Start with the Balance Gas, next enter the Minor Component followed by the Minor Component Concentration. Then select the Mixture Grade and finally the Cylinder Size. Add a dash “-” before the size code to complete the part number. Let's create a part number. For example, take a Primary Standard grade of 5 ppm NITRIC OXIDE balance NITROGEN in a size DA cylinder. From the table below we can follow the tables to come up with **NI NO5MP-DA**.

Balance Gas (A B)		Minor Comp Code (C D E)		Minor Component Concentration ([E] F G H I)		Mixture Grade (J)		Cylinder Size (K L)
